

Shared Equipment Advisory Report

The following table contains information on products in which the manufacturer *does not* provide voluntary information on its labels regarding potential cross-contamination with the 8 major food allergens. The data is compiled through manufacturer interviews and from publicly released documentation regarding their processing practices. The table identifies which allergen ingredients are produced on the same equipment.

Please be aware that ingredients may vary for the same product manufactured at different plants in different parts of the country. Always review the label prior to purchasing as manufacturers change processing practices often.

For additional questions regarding the processing of specific manufacturer's products, ELL advises consumers to contact the manufacturer directly.

Table Key: **E** = Egg, **F** = Fish, **M** = Milk, **P** = Peanut, **S** = Soy, **SF** = Shell Fish, **T** = Tree Nut, **W** = Wheat,
* = Produced on equipment that is designated free of any of the 8 major allergens.

The information appearing in this report is presented for your support and general informational purposes only and is not intended to constitute medical advice or treatment or to replace the relationship that exists between an individual and your physician. Always consult your physician for questions regarding the safety of a product for your allergic child. The complete Terms of Use agreement can be viewed at <http://ellfoundation.org/terms-of-use/>.
